

AU Training and Development Sessions

Individuals must engage in continuous professional development (CPD) in order to broaden their skill set, stay up to date with industry innovations, and maintain their competitiveness in the fast-paced labour market of today. Our programme, "Enhancing Professional Growth," is intended to equip participants with the skills, information, and techniques needed to start a lifetime learning and development journey in order to support this process.

Rapid technological innovation has made it important for Air University to provide its staff, teachers, and students with the skills they need to succeed in the digital world. In order to achieve this, we held a thorough Continuous Professional Development (CPD) training programme with the goal of modernising skills and embracing the digital age. This training is a critical step in equipping our community to thrive in the rapidly changing technology environment.

Empowering Women Entrepreneurs at Pak- China Centre Pakistan

The event gave women entrepreneurs a venue for business networking, product display, modern technique learning, marketing method knowledge, product development for a worldwide market, and export promotion. At the national level, women from all disciplines received exposure, which improved their comprehension of marketing tools. Along with its primary goal of enhancing gender diversity in our enterprises, capacity building training sessions were also planned as ancillary activities. In this regard, Air University encouraged their students, staff and faculty to become participant of such a fruitful session

Empowering Women Entrepreneurs

INTRODUCTION

Trade Development Authority of Pakistan (TDAP), Ministry of Commerce is organizing an exhibition titled "Her Hunar" on 4th & 5th March, 2023 at Pak-China Friendship Center, Islamabad to encourage women entrepreneurs hailing from North Pakistan including Chitral, Swat, Dera Ismail Khan, Hazara Division, Gilgit Baltistan (GB), Azad Jammu and Kashmir (AJK), Islamabad and Rawalpindi.

Product Design and Development for Amazon

A product development training session for Amazon was conducted by Air University. This programme is an example of the university's commitment to advancing gender equality among students, teachers, and employees. The training gives people the skills they need to succeed in the field by promoting an inclusive training approach, boosting skills, providing gender-inclusive models, encouraging equitable participation, and providing networking and mentorship possibilities. With the help of these programmes, our institution hopes to develop a workforce that is more diverse and inclusive and allows everyone the opportunity to succeed..
