

Disability Support Office

At Air University

- The Student Affairs Department is headed by Director Student Affairs, who works through a Proctor, Assistant Proctor (female) and an Office Assistant. The department is responsible to ensure implementation of the general code of conduct i.e. dress code, discipline and behavioral standards etc.
- The idea of treating all students fairly and equally, regardless of their color, religion, or cultural background, has been established by the student affairs department. We have built a platform where we think we can fully facilitate our students' learning. Particularly for those who are disabled and unable to complete the assignment on their own, we have provided our special students with specialized attention and care so that they won't encounter any issues while completing the exercise. Regardless of whether a student is disabled or not, we deal with their grievances in a separate counselling center after conducting careful investigations.
- We hold break-out sessions with disabled students to determine their areas of strength and weakness, meet their needs, and enhance our department's performance while still upholding their standards. To maintain the high standard of the class, we have given our pupils access to specialised and cutting-edge technologies. The department is crucial in promoting awareness of issues relating to disabilities and fighting for the needs and rights of students with disabilities. The department promotes an environment of understanding and support among students, professors, and staff through holding workshops, seminars, and awareness campaigns. The department's primary goal is to get impaired students ready for fulfilling professions after they graduate. Services for career counselling and placement are designed to address the particular difficulties and opportunities presented by impaired students in the job market
